**FORM 2**  
**MCH BUDGET DETAILS FOR FY 2010**

[Secs. 504 (d) and 505(a)(3)(4)]

**STATE: AK**

**1. FEDERAL ALLOCATION**

(Item 15a of the Application Face Sheet [SF 424])  
Of the Federal Allocation (1 above), the amount earmarked for:

\$ 1,116,274

A.Preventive and primary care for children:

\$ 368,370 ( 33%)

B.Children with special health care needs:

\$ 368,370 ( 33%)

(If either A or B is less than 30%, a waiver request must accompany the application)[Sec. 505(a)(3)]

C.Title V administrative costs:

\$ 111,627 ( 10%)

(The above figure cannot be more than 10%)[Sec. 504(d)]

**2. UNOBLIGATED BALANCE** (Item 15b of SF 424)

\$ 75,000

**3. STATE MCH FUNDS** (Item 15c of the SF 424)

\$ 10,890,461

**4. LOCAL MCH FUNDS** (Item 15d of SF 424)

\$ 0

**5. OTHER FUNDS** (Item 15e of SF 424)

\$ 0

**6. PROGRAM INCOME** (Item 15f of SF 424)

\$ 50,000

**7. TOTAL STATE MATCH** (Lines 3 through 6)

(Below is your State's FY 1989 Maintenance of Effort Amount)

\$ 4,471,700

\$ 10,940,461

**8. FEDERAL-STATE TITLE V BLOCK GRANT PARTNERSHIP (SUBTOTAL)**

(Total lines 1 through 6. Same as line 15g of SF 424)

\$ 12,131,735

**9. OTHER FEDERAL FUNDS**

(Funds under the control of the person responsible for the administration of the Title V program)

a. SPRANS: \$ 0

b. SSDI: \$ 94,644

c. CISS: \$ 0

d. Abstinence Education: \$ 0

e. Healthy Start: \$ 0

f. EMSC: \$ 0

g. WIC: \$ 0

h. AIDS: \$ 0

i. CDC: \$ 2,976,090

j. Education: \$ 0

k. Other: \$ 0

HRSA other \$ 750,342

Title X-Family Plan. \$ 621,108

**10. OTHER FEDERAL FUNDS** (SUBTOTAL of all Funds under item 9)

\$ 4,442,184

**11. STATE MCH BUDGET TOTAL**

(Partnership subtotal + Other Federal MCH Funds subtotal)

\$ 16,573,919

## FORM NOTES FOR FORM 3

None

### FIELD LEVEL NOTES

1. **Section Number:** Form3\_Main  
**Field Name:** UnobligatedBalanceExpended  
**Row Name:** Unobligated Balance  
**Column Name:** Expended  
**Year:** 2007  
**Field Note:**  
With the changes in funding with less state dollars appropriated for SFY07, the MCH Block had less of a balance than anticipated.
2. **Section Number:** Form3\_Main  
**Field Name:** StateMCHFundsExpended  
**Row Name:** State Funds  
**Column Name:** Expended  
**Year:** 2008  
**Field Note:**  
Additional funds from WIC came available for pregnant women and children. In addition, a supplemental spending bill containing funds for early intervention came through the legislature. Additional general funds were awarded for autism expansion clinics and diagnostic services
3. **Section Number:** Form3\_Main  
**Field Name:** StateMCHFundsExpended  
**Row Name:** State Funds  
**Column Name:** Expended  
**Year:** 2007  
**Field Note:**  
With the changes in program reporting, the ability to utilize funds from other programs, in this case, Medicaid state general fund dollars, were no long able to be included.
4. **Section Number:** Form3\_Main  
**Field Name:** ProgramIncomeExpended  
**Row Name:** Program Income  
**Column Name:** Expended  
**Year:** 2007  
**Field Note:**  
Program income had been budgeted and entered at the time of the application submittal. It is not known why the budgeted amount of 50K did not show up in the reporting this year.

## FORM NOTES FOR FORM 4

None

### FIELD LEVEL NOTES

1. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership  
**Field Name:** PregWomenExpended  
**Row Name:** Pregnant Women  
**Column Name:** Expended  
**Year:** 2008  
**Field Note:**  
Additional fund from WIC rebates were received and applied to the program
2. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership  
**Field Name:** PregWomenExpended  
**Row Name:** Pregnant Women  
**Column Name:** Expended  
**Year:** 2007  
**Field Note:**  
Due to changes in programs and their ability to report expenditures, funds anticipated to be utilized were not forthcoming and could not be counted in the expenditure reporting
3. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership  
**Field Name:** Children\_0\_1Expended  
**Row Name:** Infants <1 year old  
**Column Name:** Expended  
**Year:** 2008  
**Field Note:**  
Addition funds from WIC rebates were recieved and applied to funding services for infants less than one year in the areas of breastfeeding support and formula distribution as appropriate for non breastfeeding moms
4. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership  
**Field Name:** Children\_0\_1Expended  
**Row Name:** Infants <1 year old  
**Column Name:** Expended  
**Year:** 2007  
**Field Note:**  
With changes in program reporting, expenditures that historically have been included were not able to be included. Most of the difference is attributed to the changes in Medicaid EPSDT program management. This program stayed behind in the Division of Health Care Services when some of the MCH programs were regrouped and transferred back to the Division of Public Health
5. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership  
**Field Name:** Children\_1\_22Expended  
**Row Name:** Children 1 to 22 years old  
**Column Name:** Expended  
**Year:** 2008  
**Field Note:**  
WIC rebates were recieved and applied to the population of 1-3 year olds.
6. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership  
**Field Name:** Children\_1\_22Expended  
**Row Name:** Children 1 to 22 years old  
**Column Name:** Expended  
**Year:** 2007  
**Field Note:**  
With changes in program reporting, expenditures that historically have been previsouly included were not able to be included.
7. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership  
**Field Name:** CSHCNExpended  
**Row Name:** CSHCN  
**Column Name:** Expended  
**Year:** 2008  
**Field Note:**  
additional federal funds were recieved through federal grants for children with hearing loss
8. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership  
**Field Name:** AllOthersExpended  
**Row Name:** All Others  
**Column Name:** Expended  
**Year:** 2008  
**Field Note:**  
additional federal funds were recieved and matched for infrostructure support from Medicaid
9. **Section Number:** Form4\_I. Federal-State MCH Block Grant Partnership  
**Field Name:** AdminExpended  
**Row Name:** Administration  
**Column Name:** Expended  
**Year:** 2008  
**Field Note:**  
Additional funds were received to support administrative expenses from other federal fund sources.

**Year:** 2007

**Field Note:**

Ongoing infrastructure will continue with the addition of a Toddler Survey (CUBS-two year old follow up) to be piloted this federal fiscal year. Expenditures in this category have remained fairly constant over time despite the reorganizational changes. Evaluation components will be added to all of the existing programs in WCFH to measure outcomes of performance and assure goals, objectives and improvements in the health of our populations are taking place. A closer working relationship between surveillance and data analysis/evaluation staff ( MCH Epidemiology unit) and program staff will be developed over this next fiscal year now that MCH programs are more fully integrated and located back in the Division of Public Health.

**11. Section Number:** Form5\_Main

**Field Name:** InfrastrBuildExpended

**Row Name:** Infrastructure Building Services

**Column Name:** Expended

**Year:** 2008

**Field Note:**

Additional resources were added in the areas of staff for the MCH epidemiology unit, information technology updates and training of epidemiology staff.

**12. Section Number:** Form5\_Main

**Field Name:** InfrastrBuildExpended

**Row Name:** Infrastructure Building Services

**Column Name:** Expended

**Year:** 2007

With the reorganization of the mch program back to public health, the EPSDT program which was heavily funded with state general fund dollars, did not transfer with the other mch programs. Thus the funding was not forthcoming to be focused on the various population groups most affected by the EPSDT program.

The MCH structure is heavily focused on infratstructure building as a means to support state systems and care and access by private and tribal health care providers. This is intentional and meant to be a long term strategy in supporting MCH programs over time.

### FIELD LEVEL NOTES

1. **Section Number:** Form9\_Main

**Field Name:** calls\_2

**Row Name:** Number of calls received On the State MCH Hotline This reporting period

**Column Name:** FY

**Year:** 2008

**Field Note:**

Over 350 calls were received through the telephone hotline number . These calls come in through the primary office number for the Section of Women's, Children's and Family Health. Callers request information regarding programs and services offered, assistance with providers, options for financial assistance. The number of calls has stayed relatively consistent over the last couple of years. It is expected that the numbers may stay about the same even as the 211 information services becomes more popular.

**FORM 10**  
**TITLE V MATERNAL & CHILD HEALTH SERVICES BLOCK GRANT**  
**STATE PROFILE FOR FY 2010**  
*[SEC. 506(A)(1)]*  
**STATE: AK**

1. State MCH Administration:  
(max 2500 characters)

The Section of Women's, Children's and Family Health within the Division of Public Health, Alaska Department of Health and Social Services, administers the MCH Title V program. Services included within Title V administrative control include: 1. CSHCN related programs cover Specialty Clinics (Cleft Lip and Palate Clinic and Neurodevelopmental/Autism Clinics, Birth Defects, Genetics and Metabolic Clinics, Newborn Metabolic Screening, and Early Hearing Detection and Intervention (EHDI) Program/Universal Newborn Hearing screening 2. Direct and Enabling services for women and children through grants or contracts include Breast and Cervical Cancer Screening Outreach, parent navigation services for CSHCN, and Family Planning and Reproductive Health Services offered through Public Health nursing centers, community health centers and federally qualified health centers and partnerships serving adolescent populations 3. Data collection and surveillance activities include the Alaska Birth Defects/ FAS Registry, the Alaska Maternal and Infant Mortality Review/Child Death Review, PRAMS, Toddler Survey (CuBS), Alaska Surveillance of Child Abuse and Neglect, and special research and data analysis projects. Other programs that are not administered by Title V, but collaborate closely with Title V include programs influencing the health and safety of young children and adolescents including Early Intervention/Infant Learning program, EPSDT, Alaska Immunization Program, Women, Infants and Children (WIC) Nutrition program, Family Violence Prevention, Childhood and Adolescent Injury Prevention, Family Nutrition, and the Early Comprehensive Care Systems (ECCS), Strengthening Families Initiative, Assuring Better Child Development Screening Academy, Early Childhood Mental Health, School Health and programs focused on chronic disease such as diabetes, asthma, and heart disease. Several of these aforementioned programs receive Title V funding in support of their outcome objectives.

Block Grant Funds

2. Federal Allocation (Line 1, Form 2)	\$ 1,116,274
3. Unobligated balance (Line 2, Form 2)	\$ 75,000
4. State Funds (Line 3, Form 2)	\$ 10,890,461
5. Local MCH Funds (Line 4, Form 2)	\$ 0
6. Other Funds (Line 5, Form 2)	\$ 0
7. Program Income (Line 6, Form 2)	\$ 50,000
<b>8. Total Federal-State Partnership (Line 8, Form 2)</b>	<b>\$ 12,131,735</b>

9. Most significant providers receiving MCH funds:

Children with Special Health Care Needs
Parent navigation services for Children with CSHCN
Child abuse and domestic violence prevention spec.
Providers of diagnostic services for autism

10. Individuals served by the Title V Program (Col. A, Form 7)

a. Pregnant Women	11,056
b. Infants < 1 year old	11,139
c. Children 1 to 22 years old	234,498
d. CSHCN	3,097
e. Others	0

11. Statewide Initiatives and Partnerships:

a. Direct Medical Care and Enabling Services:  
(max 2500 characters)

Direct Medical Care and Enabling Services: i. Family Planning and Reproductive Health Services - Family planning and related preventive health services were provided to teens of all ages at State Public Health Centers, Community Health Centers and private health care clinics in Alaska. The State of Alaska's Family Planning Program continues to support efforts reduce the incidence of Statutory Rape in Alaska (the statutes refer to this as Sexual Abuse of a Minor 1-4). Staff continue to refine their training model to increase awareness and understanding by clinical health care providers of the inherent risks associated with Statutory Rape, their role as mandatory reporters, and ways to approach teens and educate them on issues associated with unhealthy relationships. WCFH completed its first two years of an interdepartmental agreement with the Division of Public Assistance on a the "Out of Wedlock and Teen Pregnancy Prevention initiative utilizing TANF funding. Funding is currently directed to interested community-based youth programs in pilot communities where there is documented high out-of-wedlock/teen pregnancies and lack of family planning services. Coordination of these services is occurring with federally qualified health centers and community health centers. ii. Specialty Clinics - Since there are no pediatric geneticists in Alaska, Seattle Children's Hospital and Regional Medical Center (CHRM) is contracted to conduct statewide outreach clinics. The contract includes services of clinical geneticists who offer diagnostic clinics for children/adults with genetic diseases, birth defects, or persons at risk for genetic conditions because of ethnicity, family history or age. Efforts are made to involve local health practitioners in these clinics to insure coordination of care. No one was refused services due to inability to pay. Clinics are coordinated with public health nursing centers in smaller communities outside of Anchorage. Outreach for referrals and education has been focused on federally qualified health centers and community health centers across the state. Other clinics offered include Neurodevelopmental and Autism, Neurology and Cleft Lip and Palate Team clinics.

b. Population-Based Services:  
(max 2500 characters)

Population-based Services: i. Newborn Metabolic Screening Program -100% of infants in the state were screened. Education of hospital staff is so successful that screening refusals are zero in most communities. All infants identified with CAH and carnitine disorders are referred to the Genetics and/or Metabolic Clinics conducted by the State of Alaska. Infants identified with hypothyroidism are put on treatment and linked with the local pediatric endocrinologist. Those infants identified with hemoglobinopathies are referred to the local pediatric hematologist/oncologist. Also, infants identified with reportable conditions are entered into the Alaska Birth Defects/FAS Registry. ii. Newborn Hearing Screening-over 90% of all infants born in Alaska were screened for hearing prior to their discharge from the hospital or birthing center. Title V staff assist to coordinate the program in hospitals, birthing centers and with nursing public health centers in communities where there are fewer than 35 births per year. Staff are also responsible for establishing linkages with private audiologists, early intervention programs and speech language therapists. iii. Alaska Immunization Program: This program consists of education, public awareness and compliance activities in partnership with schools and private organizations. Statewide broadcasts of public service announcements and public relations campaigns with the Iditarod Trail Committee are designed to raise public awareness. A statewide conference and presentations to professional public health staff

provide training opportunities, and assessments at public health centers and private practices ensure compliance and availability of vaccines. iv. Perinatal program-this program is in the midst of assessing where the greatest needs are in communities and focused on outreach education around such issues as postpartum depression, preterm delivery and low birth weight prevention, smoking cessation, appropriate maternal weight, and SIDS/roll over death prevention information and education. v. Child Passenger Safety Program - All major and most hub communities now have had CPS trainings and many have some type of CPS inspection and/or education service available for families. The program continues to support, retain and increase the number of CPS technicians state wide with CPS updates and technician courses offered in Seward, Juneau, Anchorage, Kenai and Kodiak.

c. Infrastructure Building Services:  
(max 2500 characters)

The MCH-Epidemiology Unit publishes numerous reports, bulletins and peer-reviewed journal articles. One Alaska Maternal and Child Health Data Book will be published in SFY09: The MCH Surveillance edition reporting on PRAMS data and other collected surveillance data. The Toddler Survey using the model of PRAMS was initiated this year. Other special analysis and burden documents produced include an analysis of MIMR data and the health disparities of perinatal deaths in Alaska, a study on Attention Deficit Disorder and other analyses as requested. In addition, Alaska SCAN (Alaska Surveillance of Child Abuse and Neglect was established this year to gather data on child maltreatment from a variety of sources to offer a more complete picture of child maltreatment. Improved linkages between the use of data and programs have been initiated to assist programs in the use of better outcome evaluation methodology. Other infrastructure based activities include ongoing work and development of advisory committees made up of parents, consumers, health care provider and agency stake holders for adolescents, newborn metabolic screening, early hearing detection and intervention and children and youth with special health care needs. Ongoing assessment of the needs of communities is inherent in the work done by programs. Administrative staff are also intimately involved in policy making in many areas as well as conducting quality assurance and helping to community and adhere to established standards of practice.

Data source: Alaska Newborn Metabolic Screening Program.

In addition, 166 hemoglobin traits were identified but not included in the denominator since no treatment is indicated for these traits. There were also 7 other infants identified with conditions that did not need treatment but which could be important for families and medical providers to know about.

**PERFORMANCE MEASURE # 02**

The percent of children with special health care needs age 0 to 18 years whose families partner in decision making at all levels and are satisfied with the services they receive. (CSHCN survey)

Denominator					

**Field Level Notes**

1. **Section Number:** Form11\_Performance Measure #12

**Field Name:** PM12**Row Name:****Column Name:****Year:** 2008**Field Note:**

62 infants were not available for screening for one of the following reasons: parental refusal, parental non-response, moved out of state, infant deceased. They were not included in the denominator.

Steady increases are occurring thanks to the active support by the direct entry midwife community in referring families for screening. Hearing screening equipment is available in the communities where the majority of home births or birthing center births occur. Intensive follow up of these families through registered mail and follow up phone calls has also resulted in some families seeking hearing screening for their newborns.

2. **Section Number:** Form11\_Performance Measure #12

**Field Name:** PM12**Row Name:****Column Name:****Year:** 2007**Field Note:**

Data Source: AK Bureau of Vital Statistics, AK Newborn Hearing Screening Program

3. **Section Number:** Form11\_Performance Measure #12

**Field Name:** PM12**Row Name:****Column Name:****Year:** 2006**Field Note:**

Source: AK Bureau of Vital Statistics; AK Newborn Hearing Screening Program.

The numerator includes infants who were screened and born in non-hospital settings.

Some birthing facilities were late in reporting data, therefore, the indicator may be revised at a later date.

**PERFORMANCE MEASURE # 13**

Percent of children without health insurance.

**Annual Objective and Performance Data**

	2004	2005	2006	2007	2008
Annual Performance Objective	8	14	10	9	8.5
Annual Indicator	11.9	9.2	9.4	11.2	
Numerator	23,730	17,880	18,108	21,501	
Denominator	199,150	195,240	192,234	192,254	

**Data Source**

Check this box if you cannot report the numerator because  
 1. There are fewer than 5 events over the last year, and  
 2. The average number of events over the last 3 years is fewer than 5 and therefore a 3-year moving average cannot be applied.

(Explain data in a year note. See Guidance, Appendix IX.)

**Field Level Notes****1. Section Number:** Form11\_State Performance Measure #8**Field Name:** SM8**Row Name:****Column Name:****Year:** 2008**Field Note:**

Numerator: Number of reported cases of Fetal Alcohol Spectrum Disorders (FASD) during a consecutive three-year time period.

Denominator: Total number of Alaska-resident live births during a consecutive three-year time period.

Data on the number of children born with Fetal Alcohol Spectrum Disorders (FASD) are based on reports of ICD-9 code 760.71 to the Alaska Birth Defects Registry. Data is presented as 3-year averages - for example, data presented for reporting year 2008 is for children born in 1999-2001.

Since more children will be diagnosed as they get older, the prevalence for any specific cohort will change year to year. For the reporting year 2009, the prevalence of FASD for children born 2000-2002 is 16.9 (n=505, d=29,930), as of April 2009. The average age of diagnosis for FAS is 5-6 years. Due to the small number of annual events that occur in Alaska, rates are presented for three-year birth cohorts.

**2. Section Number:** Form11\_State Performance Measure #8**Field Name:** SM8**Row Name:****Column Name:****Year:** 2007**Field Note:**

Data Source: Alaska Bureau of Vital Statistics for the number of live births.

Data on the number of children born with Fetal Alcohol Spectrum Disorders (FASD) are based on reports of ICD-9 code 760.71 to the Alaska Birth Defects Registry.

For each reporting year, prevalence is calculated for several birth cohorts, but only one cohort is shown in the table. For example, data presented for reporting year 2007 is for children born 1998- 2000, as of May 2008.

Since more children will be diagnosed as they get older, the prevalence for any specific cohort will change year to year.

For the reporting year 2008, the prevalence of FASD for children born 1999 - 2001 is 15.4 (n=462, d=29948), as of May 2008.

The average age of diagnosis for FAS is age 5-6 years. Due to the small number of annual events that occur in Alaska, rates are presented for three-year birth cohorts.

**3. Section Number:** Form11\_State Performance Measure #8**Field Name:** SM8**Row Name:****Column Name:****Year:** 2006**Field Note:**

Data Source: Alaska Bureau of Vital Statistics is the reporting source for the number of live births. Data on the number of children born with Fetal Alcohol Spectrum Disorders (FASD) will be provided based on reports of ICD-9 code 760.71 to the Alaska Birth Defects Registry.

Starting with reporting year 2006, the methodology in measuring this indicator changed. Previously, we measured rates of FAS. In reporting year 2006 and henceforth, we shall be reporting on FASD.

Due to the small number of annual events that occur in Alaska, rates are presented for three-year birth cohorts. Data presented in the FY 2008 block grant, for reporting year 2006, is based on an analysis performed on children born during the years 1997- 1999, as of June 2007.

For the reporting year 2007, the prevalence of FASD for children born 1998 - 2000 is 18.1 (n=542, d=29868), as of June 2007.

The average age of diagnosis for FAS is age 5-6 years. Birth cohorts who are age six in the reporting year (2007) will be included in the numerator.

**STATE PERFORMANCE MEASURE # 9**

Percentage of infants who are reported to have a Cleft Lip/Palate defect who access the Title V sponsored Cleft Lip and Palate Specialty Clinic within the first year of life.

Data wasnot evaluated for this state performance measure for this year's submission. We are re-evaluating the usefulness of this indicator as a measure effectiveness of our CLP referral process.

Some families do not participate in state-sponsored Cleft Lip and Palate Specialty Clinics even though they have been referred to the clinics. Instead they choose to seek medical care out of state for a variety of reasons (to be near extended family, to access a Craniofacial center closer to their homes than the nearest state-sponsored clinic, to remain within the military healthcare system, or to address other major health problems that cannot be treated at facilities within the state). In addition some children who have cleft palates in conjunction with other life-threatening conditions do not survive long enough to participate in state-sponsored clinics.

**2. Section Number:** Form11\_State Performance Measure #9**Field Name:** SM9**Row Name:****Column Name:****Year:** 2007**Field Note:**

## FORM NOTES FOR FORM 13

None

### FIELD LEVEL NOTES

- 1. Section Number:** Form13\_Main  
**Field Name:** Question1  
**Row Name:** #1. Family members participate on advisory committee or task forces...  
**Column Name:**  
**Year:** 2010  
**Field Note:**  
Family members and consumers are included as active members in all of the advisory councils sponsored by the MCH Title V/CSHCN program. These include, EHD1, NBMS, Adolescent health, Perinatal, Oral Health, Breast and Cervical Health Check, Autism/Neurodevelopmental, ECCS, and many other ad hoc groups. New committees in formation include School Health, school nursing and a teen advisory committee. In addition, Title V staff participate in committees that include parents including the Governor's Council for Disabilities and Special Education.
- 2. Section Number:** Form13\_Main  
**Field Name:** Question2  
**Row Name:** #2. Financial support (...) is offered for parent activities or parent groups.  
**Column Name:**  
**Year:** 2010  
**Field Note:**  
When ever parents/families participate, efforts to include those from outside of Anchorage or hub communities is made. Travel is by air much of the time, so travel expenses include hotel, ground and meal per diem as well. Upon occasion, assistance can be provided for child care, but this not always possible due to state procurement restrictions. Our programs attempt to be creative in this area, however. With the recent hire of a staff position for Parent Services, this member now attends many of the planning committees regarding the ECCS plan, Strengthening Families (child abuse prevention effort) early child hood mental health and other community agency meetings to assure that the voice of parents is considered in the planning.
- 3. Section Number:** Form13\_Main  
**Field Name:** Question3  
**Row Name:** #3. Family members are involved in the Children with Special Health Care Needs...  
**Column Name:**  
**Year:** 2010  
**Field Note:**  
Family members participate in providing feedback all year in meeting our performance measures and assuring that programs are meeting the needs of children and families. This year the new state staff member, Kris Green along with Family Voices Chair, Barbara Chambers, provided leadership in representing the MCH Title V/CSHCN program as a parent representative for the AMCHP state team and participates in meetings associated with the MCH Block grant review. MCH funds are also utilized to pay for a family member or staff member of CSHCN to attend the MCH Block grant review in Seattle at the Region X office. Kris and Barb actively participates in planning and educational activities with other state family representatives including Becky Adelman from Oregon and Cassie Johnson, and Susan Reyl from Washington. This year for the first time, a newly formed parent advisory committee was asked to participate in giving feedback to the block grant performance measures regarding CSHCN. A rich discussion ensued with excellent ideas proposed to change systems statewide in support of improving the experience for families.
- 4. Section Number:** Form13\_Main  
**Field Name:** Question4  
**Row Name:** #4. Family members are involved in service training of CSHCN staff and providers.  
**Column Name:**  
**Year:** 2010  
**Field Note:**  
The new position for Parent Services and Autism has begun develop curriculum for training all new staff on parent involvement and inclusion. A technical assistance request has been submitted as part of this years application for cultural competency assessment and training to assure that this aspect is well represented.
- 5. Section Number:** Form13\_Main  
**Field Name:** Question5  
**Row Name:** #5. Family members hired as paid staff or consultants to the State CSHCN program...  
**Column Name:**  
**Year:** 2010  
**Field Note:**  
The MCH Title V program has a contract with the Stone Soup Group for parent navigation services. Parent navigation is provided for all specialty clinics (genetics, metabolic, neurodevelopmental, autism, and cleft lip and palate). They are also actively involved in the ECCS grant and any planning. In November of 2008, a parent was hired in the role of Parent Services and Autism Development. Along with many other responsibilities, she is tasked to assure that the voice of parents is well represented in all of the programs and that programs and systems are designed with parents involvement and input. She recently formed a parent advisory committee as well.
- 6. Section Number:** Form13\_Main  
**Field Name:** Question6  
**Row Name:** #6. Family members of diverse cultures are involved in all of the above activities  
**Column Name:**  
**Year:** 2010  
**Field Note:**  
Latino/Hispanic and Alaska Native cultures are the predominant ethnic cultures in Alaska. Thus we seek to make sure they are always well represented on the advisory groups. Assuring that men are involved has also been very important. African American and Asian populations are well represented on the staff in programatic and support functions and they are frequently involved in planning. Better recruitment of other ethnic populations remains at the top of our list.

**FORM 14**  
**LIST OF MCH PRIORITY NEEDS**

[Sec. 505(a)(5)]

**STATE: AK FY: 2010**

Your State's 5-year Needs Assessment should identify the need for preventive and primary care services for pregnant women, mothers, and infants; preventive and primary care services for children and services for Children with Special Health Care Needs. With each year's Block Grant application, provide a list (whether or not the priority needs change) of the top maternal and child health needs in your state. Using simple sentence or phrase, list below your State's needs. Examples of such statements are: "To reduce the barriers to the delivery of care for pregnant women, " and "The infant mortality rate for minorities should be reduced."

MCHB will capture annually every State's top 7 to 10 priority needs in an information system for comparison, tracking, and reporting purposes; you must list at least 7 and no more than 10. Note that the numbers listed below are for computer tracking only and are not meant to indicate priority order. If your State wishes to report more than 10 priority needs, list additional priority needs in a note at the form level.

1. Reduce rate of drug use among families, primarily alcohol intake and cigarette use.
2. Reduce the rate of child abuse and neglect.
3. Increase public awareness and access to health care services for children and CSHCN.
4. Reduce the rate of unplanned and unwanted pregnancies (including teen pregnancy).
5. Increase access to dental health services for children.
6. Reduce the rate of domestic violence.
7. Reduce the rate of post-neonatal mortality.
8. Reduce the rate of teen suicide.
9. Reduce the prevalence of childhood obesity and overweight.
10. Increase awareness around mental health issues in the MCH population.

**FORM NOTES FOR FORM 15**

None

**FIELD LEVEL NOTES**

None

**FORM 16**  
**STATE PERFORMANCE AND OUTCOME MEASURE DETAIL SHEET**  
**STATE: AK**

SP # 1

**PERFORMANCE MEASURE:**

Percentage of mothers of newborns who say their physician or health plan would not start prenatal care as early as they wanted or they could not get an appointment as early as they wanted.

**STATUS:**

Active

**GOAL**

To ensure early entrance into prenatal care to enhance pregnancy outcomes.

**DEFINITION**

**Numerator:**

Number of women delivering a live-born infant who wanted prenatal care and reported that their doctor or health plan would not start prenatal care as early as they wanted or they could not get an appointment as early as they wanted.

**Denominator:**

Total number of Alaska-resident women delivering a live-born infant who wanted prenatal care.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Objective 16-16a

Increase the proportion of pregnant women who receive early and adequate prenatal care beginning in the first trimester of pregnancy to 90%.

**DATA SOURCES AND DATA ISSUES**

Alaska Pregnancy Risk Assessment Monitoring System. PRAMS is a weighted State based survey that can be generalized to Alaska-resident women who delivered an in-state live-born infant during the calendar year specified.

**SIGNIFICANCE**

Early identification of maternal disease and risks for complications of pregnancy or birth are the primary reason for first trimester entry into prenatal care. Alaska PRAMS data has shown that 1 in 5 women did not get prenatal care as early as they wanted. Reported barriers to receiving prenatal care as early as they wanted included, 'couldn't get an appointment earlier' (28.6%) and 'doctor or health plan would not start earlier' (13.8%).

SP # 2

**PERFORMANCE MEASURE:**

Percent of women who smoked during the last 3 months of pregnancy among women who smoked 3 months prior to pregnancy and were talked to about the effects of smoking by a prenatal health care provider.

**STATUS:**

Active

**GOAL**

To reduce the number of women who smoke prenatally.

**DEFINITION**

**Numerator:**

Number of women delivering a live-born infant who reported that they smoked 3 months prior to pregnancy and had been talked to about the effects of prenatal smoking by a prenatal health care provider and reported that they also smoked during the last 3 months of pregnancy.

**Denominator:**

Total number of Alaska-resident women delivering a live-born infant who reported that they smoked 3 months prior to pregnancy and had been talked to about the effects of prenatal smoking by a prenatal health care provider.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Objective 16-17c

Increase the proportion of women who abstain from cigarette smoking during pregnancy to at least 99%.

Related to Objective 1-3b

Increase counseling about smoking cessation (among population, not just pregnant women).

**DATA SOURCES AND DATA ISSUES**

Alaska Pregnancy Risk Assessment Monitoring System. PRAMS is a weighted State based survey that can be generalized to Alaska-resident women who delivered an in-state live-born infant during the calendar year specified.

**SIGNIFICANCE**

Maternal smoking during pregnancy is associated with increased infant morbidity and mortality especially as it relates to preterm and low birth weight infants. Maternal smoking during pregnancy may result in a lower birth weight, spontaneous abortion, or other serious complications of pregnancy. Mothers who smoke throughout pregnancy usually have infants that weigh between 150 to 300 grams less than non-smoking mothers. Based on Alaska smoking rates, research reported by the U.S. Surgeon General indicates that 5% of perinatal deaths, 20% of low birth-weight babies, and 8% of pre-term deliveries could be avoided annually in Alaska if maternal smoking were eliminated.

SP # 3

**PERFORMANCE MEASURE:**

Percentage of children ages 10-11 who are at-risk for being overweight.

**STATUS:**

Active

**GOAL**

To reduce the percentage of children who are overweight and at-risk for being overweight.

**DEFINITION**

Number of children who are at-risk for being overweight as defined by NCHS BMI classification.

**Numerator:**

Number of children who are at-risk for being overweight as defined by NCHS BMI classification.

**Denominator:**

Total number of children ages 10-11 in Alaska.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Objective 19-3a-c

Reduce the proportion of children who are obese or overweight to 5% or less.

**DATA SOURCES AND DATA ISSUES**

Centers for Disease Control and Prevention. National Survey of Child Health. This survey is not conducted on a yearly basis.

**SIGNIFICANCE**

A recent report from the Institute of Medicine estimates that approximately nine million children over six years of age are currently obese. In Alaska, over the last two decades, the prevalence of overweight among children ages 6-11 years has more than doubled, increasing from 7% in 1980 to 15% in 2000. Overweight among adolescents ages 12-19 years has tripled during the same time period – from 5% to 15%. In addition, recent analysis of Anchorage School District data showed that more than one-third of the students assessed were overweight or at-risk of overweight.

SP # 4

**PERFORMANCE MEASURE:**

Rate (per 1,000) of substantiated reports of harm children ages 0 through 18.

**STATUS:**

Active

**GOAL**

To reduce the number of children and teenagers who experience child abuse and neglect

**DEFINITION**

x

**Numerator:**

The number of children who have a substantiated report of abuse and neglect.

**Denominator:**

The number of all children between birth and 18 years living in Alaska.

**Units:** 1000 **Text:** Rate

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Alaska Division of Family and Youth Services

**SIGNIFICANCE**

The 1995 Edition of "Child Abuse and Neglect: A Look at the States," reported in 1993, Alaska led the nation in substantiated/indicated child maltreatment in physical abuse, neglect and sexual abuse. Child abuse and neglect have short and long term consequences lasting a lifetime. Efforts must be directed toward preventing child abuse and neglect and when it does occur, assuring early intervention and support services for the child.

SP # 5

**PERFORMANCE MEASURE:**

Percentage of women who recently had a live-born infant who reported their prenatal health care provider advised them not to drink alcohol during their pregnancy.

**STATUS:**

Active

**GOAL**

To reduce the number of women who drink prenatally.

**DEFINITION**

**Numerator:**

Number of women delivering a live-born infant who reported that they had received prenatal care and had been advised not to drink alcohol by their prenatal health care provider.

**Denominator:**

Total number of Alaska-resident women delivering a live-born infant who reported that they had received prenatal care.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Objective 16-17a

Increase the proportion of women who abstain from drinking alcohol during pregnancy to at least 96%.

Related to Objective 1-3c

Increase counseling about reduced alcohol consumption (entire population, not just pregnant women).

**DATA SOURCES AND DATA ISSUES**

Alaska Pregnancy Risk Assessment Monitoring System. PRAMS is a weighted State based survey that can be generalized to Alaska-resident women who delivered an in-state live-born infant during the calendar year specified.

**SIGNIFICANCE**

Prenatal exposure to alcohol is associated with a wide range of infant outcomes from Fetal Alcohol Syndrome (FAS) to very subtle effects. FAS is the most common preventable cause of mental retardation in the U.S. In a recent advisory on alcohol use during pregnancy, the Surgeon General recommended that health professionals regularly ask women of childbearing age about alcohol use and to inform them of the risks of drinking alcohol during pregnancy. It is further recommended that they advise them not to drink alcohol during pregnancy. In Alaska during 2002, a survey of FAS Knowledge, Attitudes, Beliefs and Behaviors (KABB) found that 36% of obstetrician/gynecologists responded that it was OK for a pregnant woman to drink alcohol occasionally, more than double the percent of either Pediatricians or Family Physicians. However, over 90% of physicians strongly agreed that FAS is preventable.

SP # 6

**PERFORMANCE MEASURE:**

Prevalence (per 100) of unintended pregnancies that resulted in a live birth among women who reported having a controlling partner during the 12 months prior to getting pregnant.

**STATUS:**

Active

**GOAL**

To reduce the number of unintended pregnancies.

**DEFINITION**

x

**Numerator:**

Number of women delivering a live-born infant who reported that their pregnancy was unintended (either mistimed or unwanted) and that they had a controlling partner (i.e. husband or partner threatened her, limited her activities against her will, or made her feel unsafe in any other way) during the 12 months prior to getting pregnant.

**Denominator:**

Total number of Alaska-resident women delivering a live-born infant who reported that they had a controlling partner during the 12 months prior to getting pregnant.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Related to Objective 9-1

Increase the percentage of women who have an intended pregnancy to at least 70% (all pregnancies, not just those resulting in a live-birth).

**DATA SOURCES AND DATA ISSUES**

Alaska Pregnancy Risk Assessment Monitoring System. PRAMS is a weighted State based survey that can be generalized to Alaska-resident women who delivered an in-state live-born infant during the calendar year specified.

**SIGNIFICANCE**

In Alaska, PRAMS 2002 data showed that 45.3% of births were unintended resulting in a personal and financial burden for Alaskan families as well as the welfare system. 58.4% of births to women receiving prenatal care paid by Medicaid were unintended. Each unintended birth costs the welfare system approximately \$31,185 for the prenatal care and infant care during the first year of life. Increasing access to family planning services is a critical component in reducing unintended births.

SP # 7

**PERFORMANCE MEASURE:**

Percentage of women who recently had a live-born infant who reported that they always or often felt down, depressed, or hopeless since their new baby was born.

**STATUS:**

Active

**GOAL**

To reduce the number of women experiencing post-partum depression (need to look up HP2010, see note below) .

**DEFINITION**

**Numerator:**

Number of women delivering a live-born infant who reported that they always or often felt down, depressed, or hopeless since their new baby was born.

**Denominator:**

Total number of Alaska-resident women delivering a live-born infant.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Related to Objective 16-5c

Reduce the number of hospitalizations for post-partum complications, including depression. This is a developmental objective.

**DATA SOURCES AND DATA ISSUES**

Alaska Pregnancy Risk Assessment Monitoring System. PRAMS is a weighted State based survey that can be generalized to Alaska-resident women who delivered an in-state live-born infant during the calendar year specified.

**SIGNIFICANCE**

Alaska PRAMS 2002 data showed that 4.7% of Alaskan women delivering a live-birth reported they were very depressed and 14.5% reported they were moderately depressed. More than half (51.9%) reported they experienced low to moderate depression. Among women who self-reported postpartum depression (56.6%), more than 1 in 5 indicated they wanted to see a mental health professional and 1 in 8 had not seen one.

SP # 8

**PERFORMANCE MEASURE:**

Prevalence at birth (per 1,000) of Fetal Alcohol Spectrum Disorders (FASD).

**STATUS:**

Active

**GOAL**

To reduce the prevalence of Fetal Alcohol Spectrum Disorders (FASD).

**DEFINITION**

The prevalence at birth of fetal alcohol spectrum disorders (FASD)

**Numerator:**

Number of reported cases of Fetal Alcohol Spectrum Disorders (FASD) during a consecutive three-year time period.

**Denominator:**

Total number of Alaska-resident live births during a consecutive three-year time period.

**Units:** 1000 **Text:** Rate

**HEALTHY PEOPLE 2010 OBJECTIVE**

Relates to Objective 16-18

Reduce Fetal Alcohol Syndrome (FAS). This is a developmental objective.

**DATA SOURCES AND DATA ISSUES**

Alaska Bureau of Vital Statistics is the reporting source for the number of live births. Data on the number of children born with Fetal Alcohol Spectrum Disorders will be provided based on reports of ICD-9 code 760.71 to the Alaska Birth Defects Registry. Due to the small number of annual events that occur in Alaska, rates are presented in three-year moving averages.

**SIGNIFICANCE**

Fetal Alcohol Spectrum Disorders are 100% preventable if a woman does not consume alcoholic beverages during pregnancy. Many children with FASDs do not catch up with their peers or outgrow their disabilities and many of these problems may not be identified at birth or become obvious until the child reaches school age or later. The 1996-1998 Alaska prevalence for FAS was 1.6 per 1,000 live births. The Alaska Fetal Alcohol Syndrome Surveillance Project estimates that 163 children are born each year with effects of maternal drinking during pregnancy that may fall across the FASD continuum.

**PERFORMANCE MEASURE:**

Percentage of infants who are reported to have a Cleft Lip/Palate defect who access the Title V sponsored Cleft Lip and Palate Specialty Clinic within the first year of life.

**STATUS:**

Active

**GOAL**

Increase access to health care services to CSHCN.

**DEFINITION****Numerator:**

Number of Alaskan children from birth to age 1 that were reported to have a Cleft Lip/Palate defect and accessed the Cleft Lip and Palate Specialty Clinic.

**Denominator:**

Number of Alaskan children from birth to age age 1 that were reported to have a Cleft Lip/Palate defect.

**Units:** 100 **Text:** Percent

**HEALTHY PEOPLE 2010 OBJECTIVE**

Related to Objectives 16-23 and 21-15

These Objectives are related to increasing service systems to CSHCN and increasing recording and referral of children and youth with cleft lip/palate.

**DATA SOURCES AND DATA ISSUES**

Alaska Birth Defects Registry and the Alaska Cleft Lip and Palate Specialty Clinic Program. Not all diagnoses occur between the ages of birth and one year. Submucous cleft palates (those covered by the mucous membrane over the roof of the mouth) may be identified when children are older and develop abnormally nasal speech. Some families do not participate in state-sponsored Cleft Lip and Palate Specialty Clinics even though they have been referred to the clinics. Instead they choose to seek medical care out of state for a variety of reasons (to be near extended family, to access a Craniofacial center closer to their homes than the nearest state-sponsored clinic, to remain within the military healthcare system, or to address other major health problems that cannot be treated at facilities within the state). In addition some children who have cleft palates in conjunction with other life-threatening conditions do not survive long enough to participate in state-sponsored clinics.

**SIGNIFICANCE**

For the 5-year period 1998-2002, the rate of oral cleft among Alaskan children was 3.1 per 1,000 population – nearly 3 times higher than the national rate of 1.2 per 1,000 population. During this same period the rate of oral cleft was nearly 2 times as high among Alaska Native children as white children – 5.0 and 2.7 per 1,000 population, respectively. Early specialty care is necessary in order for these infants to thrive and remain healthy, and it provides an opportunity to educate parents about a condition that often is unfamiliar to them. Because children with clefts require many types of services over a period of years, their care must be coordinated. Specialty clinics offer a multidisciplinary approach and include providers such as plastic surgeons, speech therapists, audiologists, ear-nose-throat specialists, pediatric dentists, orthodontists, oral surgeons, pediatricians, and dietitians. This team of providers assures quality and continuity of care along with long-term follow-up that results in optimal outcomes for patients. Without treatment, these children are subject to poor weight gain due to difficulty sucking and eating, hearing loss due to untreated ear infections, unintelligible speech due to incompetent lip and palate, extensive oral disease and dental disease due to unerupted and malposed teeth, and psychological damage due to teasing.

SO # 2

**OUTCOME MEASURE:**

Death rate per 100,000 due to unintentional injuries among children 15 through 19 years.

**STATUS:**

Active

**GOAL**

To reduce the number of children and teenagers who die in Alaska from injuries from unintentional causes such as motor vehicle crashes, playground injuries, gunshots, dog maulings, falls, choking, poisoning, etc.

**DEFINITION**

Numerator: The number of children ages 15 through 19 years who die of unintentional injuries in Alaska. Denominator: The number of all children ages 15 through 19 years. All data reported as three year moving averages.

**Numerator:**

The number of children ages 15 through 19 years who die of unintentional injuries in Alaska.

**Denominator:**

The number of children ages 15 through 19 years in Alaska.

**Units:** 100000 **Text:** Rate

**HEALTHY PEOPLE 2010 OBJECTIVE**

**DATA SOURCES AND DATA ISSUES**

Bureau of Vital Statistics; the Maternal and Infant Morbidity and Mortality Committee; and the Child Fatality Review Committee.

**SIGNIFICANCE**

Alaska is the most dangerous state in the country for children and teenagers. This is according to the latest report from the Johns Hopkins Center for Injury Research and Policy. From 1986-1992, the injury death rate for Alaskans from birth through age 19 was 45.7 per 100,000. Although improved over the previous six year rate of 55.6 deaths per 100,000, Alaska's injury death rate among children and youth still ranked first in the nation and was 50% greater than the national rate of 30.2 per 100,000 (Injury to Children and Teenagers, State-by-State Mortality Facts, S.P. Baker, et al).

**HEALTH SYSTEMS CAPACITY MEASURE # 03**

The percent State Childrens Health Insurance Program (SCHIP) enrollees whose age is less than one year during the reporting year who received at least one periodic screen.

	<b>Annual Indicator Data</b>				
	<b>2004</b>	<b>2005</b>	<b>2006</b>	<b>2007</b>	<b>2008</b>
<b>Annual Indicator</b>	<u>74.7</u>	<u>76.8</u>	<u>86.5</u>	<u>68.5</u>	<u>68.4</u>
<b>Numerator</b>	<u>65</u>	<u>63</u>	<u>64</u>	<u>61</u>	<u>52</u>
<b>Denominator</b>	<u>87</u>	<u>82</u>	<u>74</u>	<u>89</u>	<u>76</u>

Check this box if you cannot report the numerator because

1. There are fewer than 5 events over the last year, and

2. The average number of events over the last 3 years is fewer

than 5 and therefore a 3-year moving average cannot be

applied.

(Explain data in a year note. See Guidance, Appendix IX.)

**Field Note:**  
Pregnant women are not funded under Title XXI, SCHIP.

**FORM 19**  
**HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM**  
**STATE: AK**

**HEALTH SYSTEMS CAPACITY INDICATOR #09A (General MCH Data Capacity)**  
*(The Ability of the State to Assure MCH Program Access to Policy and Program Relevant Information)*

DATABASES OR SURVEYS	Does your MCH program have the ability to obtain data for program planning or policy purposes in a timely manner? (Select 1 - 3) *	Does your MCH program have Direct access to the electronic database for analysis? (Select Y/N)
<b>ANNUAL DATA LINKAGES</b>		
Annual linkage of infant birth and infant death certificates	3	Yes
Annual linkage of birth certificates and Medicaid Eligibility or Paid Claims Files	3	No
Annual linkage of birth certificates and WIC eligibility files	2	No
Annual linkage of birth certificates and newborn screening files	3	Yes
<b>REGISTRIES AND SURVEYS</b>		
Hospital discharge survey for at least 90% of in-State discharges	3	No
Annual birth defects surveillance system	3	Yes
Survey of recent mothers at least every two years (like PRAMS)	3	Yes

\*Where:

1 = No, the MCH agency does not have this ability.

2 = Yes, the MCH agency sometimes has this ability, but not on a consistent basis.

3 = Yes, the MCH agency always has this ability.

**FORM 19**  
**HEALTH SYSTEMS CAPACITY INDICATOR - REPORTING AND TRACKING FORM**  
**STATE: AK**

DATA SOURCES	Does your state participate in the YRBS survey? (Select 1 - 3)*	Does your MCH program have direct access to the state YRBS database for analysis? (Select Y/N)
Youth Risk Behavior Survey (YRBS)	3	Yes
Other:		

\*Where:  
1 = No  
2 = Yes, the State participates but the sample size is not large enough for valid statewide estimates for this age group.  
3 = Yes, the State participates and the sample size is large enough for valid statewide estimates for this age group.

<b>Notes:</b>
1. HEALTH SYSTEMS CAPACITY INDICATOR #09B was formerly reported as Developmental Health Status Indicator #05.
